

Potential Local Ballot Measure

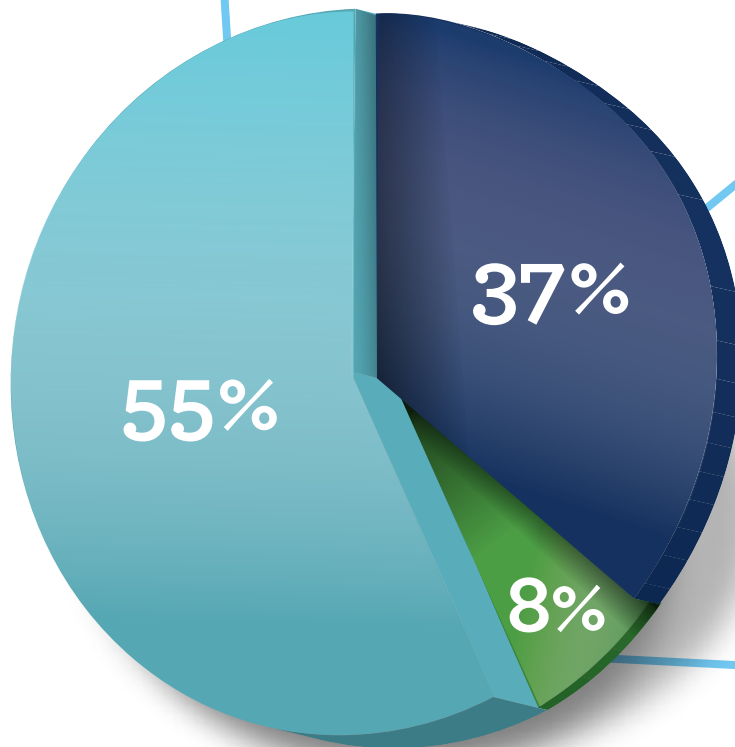

Local Funding for Parks in Our Communities

Cities and Communities

Based on the Needs Assessment data, funding will go directly back to Needs Assessment study areas, cities and communities. Funding will be in the form of direct grants as well as maintenance and servicing of parks, playgrounds and recreational facilities.

Regional Trails, Beaches, Museums, Regional Parks & Youth Employment

Projects that benefit our broader community will also receive funding in the form of direct grants as well as maintenance and servicing.

Oversight and Planning

The measure will also support planning, Needs Assessment updates, operations and the Oversight Advisory Board.

The percentages above will be reconciled with the findings in the Needs Assessment Report and subject to final approval by the Board of Supervisors.

Potential Local Park Measure

For over 20 years, our community has relied on local, voter-approved funding to protect and maintain our neighborhood parks, outdoor areas and water resources – and now this funding is expiring. When this funding expires, we will lose the only source of dedicated local funding for our neighborhood parks.

The potential local ballot measure would continue this essential locally-controlled funding to protect parks in cities and communities throughout LA County. The chart above indicates how the District proposes to divide and allocate the local funding collected from the potential ballot measure for the development and maintenance of parks in our communities.
